Image report
The img elements of the page are shown below categorized by their type of textual alternative. Please review that the images in each group match that group's definition.
Empty textual alternative—Omitted from non-graphical presentation
The following images are marked to be omitted from non-graphical presentations (alt="").
Purely decorative images belong in this category. Also, iconic images that are redundant with text next to them belong here.
If the page would become less understandable if the presence of an image was concealed, the image doesn't belong here. In that case, a textual alternative should be supplied or if the markup generator does not have a textual alternative available (because the user refused to
provide it), the alt attribute should be omitted by the markup generator.

Images with textual alternative
The following images have textual alternatives. Please review that the textual alternatives make sense considering the purpose of the image in the context of the page and that phrases like "Image of ..." are avoided.
Note that iconic images that are redundant with text next to them or purely decorative should have alt="" instead.
